

Job Vacancy Electrical Maintenance Engineer

Distinction Doors were the first company to introduce composite doors into the UK and we're still the market leader over 14 years later. We are proud of the products we sell and aim to maintain our status as the company that delivers leading edge products that move both the market and our customers' businesses forward. Delivering a top-quality door efficiently is at the heart of our offering to customers. Our continuous investment means we can do this not only now but, in the future, too. Distinction Doors' set up is state-of-the-art, as you'd expect from the tried, tested and trusted industry leader.

People are at the heart of our business at Distinction Doors and due to our recent rapid expansion, we are now looking to recruit a highly motivated Electrical Maintenance Engineer to join us. The successful applicant will be entitled to a competitive salary and a great range of benefits including:

- 25 days' holiday + bank holidays
- Bonus scheme
- Company vehicle
- Pension scheme

The Role:

This is a new position and is a critical part of the team at Distinction Doors. The Electrical Maintenance Engineer will maintain the production equipment to minimize downtime and maximise production output. You will create and deliver a planned maintenance programme and, react to breakdowns and technical issues, diagnosing faults and monitoring performance of equipment following repairs.

You will ensure all plant and equipment is operationally safe and complies with relevant legislation. The Electrical Maintenance Engineer will also plan equipment upgrades and machinery modifications replacing and commissioning machines when prescribed period of usage is complete. You will also control the maintenance tools, stores and equipment.

The Person:

- Experience of Electrical and Mechanical maintenance engineering and Engineering qualifications (including 17th edition electrical) is essential
- Experience of operating within a manufacturing environment and lean sigma is highly advantageous
- Experience of fault finding on CNC machines, edge-banding machines and beam saws, programming experience is preferred but not essential.

Job Vacancy Electrical Maintenance Engineer

- Strong communication and people skills
- A problem solver, highly analytical and proactive in approach
- The successful candidate will also be flexible in approach, self-motivated, have strong decision making and attention to detail skills
- Ability to work effectively on own initiative without supervision and positively contribute within a team environment.
- Flexibility to attend to call outs when necessary

If you share our values and have the drive and enthusiasm to help us fulfil our vision, we would like to hear from you.

Application

Please send application and a copy of your current CV to the HR Department at support@distinctiondoors.co.uk.
