

Job Vacancy

MAINTENANCE ENGINEER (NIGHT SHIFT)

Distinction Doors is a market leading composite door manufacturer based in South Yorkshire across two sites: Tankersley manufacturing site (Jct 36) and Sheffield warehouse (Jct 34). As the UK's leading GRP composite door supplier to the UK Door Fabrication industry, we pride ourselves on the excellence of our product and service. Every member of the Distinction Doors team is passionate about our composite doors. From customer service experts to technical specialists, every member of the team is dedicated to making sure that every customer benefit from the Distinction difference.

A vacancy has arisen for a Maintenance Engineer, night shift. The Maintenance Engineer will be responsible for the continuous running of the equipment and machinery using computerised systems, to oversee routine maintenance and organise repairs to ensure efficiency, development and progress of manufacturing plant.

Duties:

- Designing maintenance strategies, procedures and methods to ensure continuous cover of the machinery and equipment in case of breakdowns
- Ensure that all plant and equipment is operationally safe and complies with relevant legislation.
- Planning and undertaking scheduled maintenance
- Responding to equipment breakdowns, diagnosing faults and monitoring performance of equipment after repairs have been carried out
- Dealing with emergencies, unplanned problems and repairs
- Fitting new parts to ensure equipment is working correctly
- Planning equipment upgrades and machinery modifications
- Specifying new components for existing equipment
- Replacing and commissioning machines when prescribed period of usage is complete
- Working in co-operation with production to increase effectiveness and efficiency of the manufacturing process
- Contribute to the production of the highest quality products, good customer service and continuous improvements
- Ensuring compliance with health and safety legislation
- Maintenance of facilities as and when required

Job Vacancy

MAINTENANCE ENGINEER (NIGHT SHIFT)

Skills & Experience:

- Mechanical bias
