

Job Vacancy CNC PROGRAMMER

Distinction Doors is a trade only supplier to the UK Door Fabrication industry. Distributing quality, cost effective and innovative entrance doors, glazing cassettes and triple glazed glass that are all built to stand the test of time. We are selective over who our suppliers and customers are, they must share the same values as Distinction Doors and our high standards for product quality, customer service and innovation.

We currently have a vacancy for a CNC Programmer, reporting into the IT Manager. The role will involve interpreting blueprints, designing programs and setting up machines to produce the required product, performing test runs and making adjustments until the resulting product meets the specifications and the upkeep of an online portal.

Key Duties:

- Reading of technical drawings and create programs in accordance with these.
- Programming and operating a 5 axis CNC machine.
- Use of 2D and 3D software to model cutting paths and program machines accordingly.
- Perform quality assurance tests to ensure products meet design specifications.
- Adjust machine cutting paths or settings to optimise production & cycle times while maintaining quality.
- Consider tools required to cut materials and program machines accordingly and raising requests for bespoke tooling when required.
- Troubleshoot and resolve problems with machines as they arise.
- Work with operations department to assist in and advise of best practice and upkeep of machines.
- Maintenance of the Admin Console / Online Portal adding new hardware, ESPEC's and Door Designs when required.
- Liaising with other departments to ensure the product is correct and to specification, giving support when needed.
- Light use of EPICOR ERP System for Job Maintenance.
- Liaising with customer contacts with queries, suggestion & ad hoc requests.
- Use of AutoCAD to draw accurate dimensional technical drawings.
- Investigation of incorrect product specification claims to find the root source of the issue.
- Identify reoccurring problems within the door manufacturing process and provide solutions.
- Creation and Upkeep of all Distinction Door's technical drawings to ensure these are correct in relation to the programs used and any changes made are updated in a timely manner.
- Using knowledge of safety standards to avoid workplace accidents.
